

ICW Global Strategy • 2018-2023

Context

The global face of HIV is largely female: 51% of adults living with HIV are women (17.8 million women), and 60% of youth living with HIV are adolescents and young women (2.3 million).

Women living with HIV face serious barriers to accessing quality treatment, care and support, and to realising our full human rights, including stigma, discrimination, sexism, gender-based violence and criminalisation.

Funding for HIV is diminishing which affects the ability of our network to stay strong.

Key issues

We want to impact the world by ensuring that women living with HIV live free of gender oppression, enjoy our human rights and better health, inclusion and social wellbeing. We will focus on the following key issues affecting women living with HIV:

Eliminate gender-based violence

Promote universal access to health care, with a focus on HIV and maternal health

Promote the sexual and reproductive health and rights (SRHR) of women living with HIV

End the criminalisation of women living with HIV, in all our diversity

Ensure adequate financial investment in women and girls living with HIV

Forge a leading role for women living with HIV, particularly younger women, within HIV spaces
